

AxisTech Company Ltd and Flowmaster GmbH sign Distribution Agreement for Russia & CIS

Towcester, United Kingdom, Friday 23rd October 2009 – Flowmaster, provider of world class system simulation software and services, announced today that AxisTech Company Ltd, a Russian engineering solutions provider, have signed a distribution agreement for Flowmaster V7 software for the Russian and CIS market.

"This new partnership enables us to offer the full range of Flowmaster V7 products, technical support and services to a broad range of industries within the Russian and CIS market place" explains Alan Berry, CEO Flowmaster Group.

"One of the key attributes of Flowmaster V7 is its ability to reduce an organisation's development time to market - with the possibility of product validation in the early stages of the design cycle. It allows for a cost reduction in the design and certification process, particularly important in the gas turbine, power generation, automotive, shipbuilding, oil and gas and aerospace industries. We are delighted that through cooperation with the experienced team at AxisTech Company Ltd we shall be able now to reach into the leading areas of Russian industry to bring them the opportunity of benefitting from Flowmaster V7 and its associated services." concludes Alan Berry.

Zhanna Zhdanova, Director General of AxisTech Company Ltd. explains "Flowmaster V7 world class system simulation solutions are the perfect compliment to our range of engineering products and services. I am convinced that we will meet all of the expectations of our customers and look forward to a long and productive partnership with Flowmaster."

NOTES TO EDITOR:

About Flowmaster Group

Flowmaster Group is an International organisation with over 18 years experience providing industry leading fluid systems simulation software to the aerospace, automotive, marine, oil & gas, power generation, process, rail and water industries. With its headquarters in the United Kingdom, the Flowmaster Group employs over 70 people and has offices in the USA, Germany and India as well as distributors in many other areas of the world.

Flowmaster system simulation software enables design engineers and analysts to understand the complex internal flow and thermal effects within fluid systems at the concept stage and throughout the development process. Flowmaster provides users with a greater understanding of fluid systems much earlier, increasing quality and performance whilst shortening the development cycle.
